**Note:** For over a dozen years of offering both FCT<sup>®</sup> live and DVD courses to hundreds of health practitioners, we have not had dissatisfied students. To the contrary, we normally receive requests for more information with many students even choosing to order DVDs of the same courses that they have actually attended!

## Monthly E-letter / “FCT Workbook”

Given proper diligence and time necessary to master our system, the results for both your patients and practice will exceed your expectations. One of the strongest aspects of this system is its continuous growth based on the new information and knowledge. Therefore, it is crucial that all of our students keep up to date with both our ongoing teaching events, such as seminars, workshops, etc., as well as our periodic E-letter (a few issues a year). The latter serves as a great and open forum for exchange of crucial information between all of the health practitioners around the world who practice FCT®. Among other things, it contains challenging medical cases, clinical quizzes, and new insights/shortcuts concerning bio-resonance testing (BRT), availability of new testing filters/remedies, and numerous other vital data.

If you would like to seriously pursue FCT®, and I hope you will, you must have all the back issues of our e-letter plus the ongoing issues. Besides many and diverse clinical cases, the e-letter also shares a wealth of new testing and medical information that is simply too crucial to miss. Therefore, I would strongly advise you to order all of the back issues and establish your current subscription at the rate of \$45 (for **each** issue). As far as all the back issues are concerned starting June 2004 through the present (a total of 11 issues), we will offer you a **25% discount** on the **BULK** acquisition of **all these issues** (bringing the cost of each issue down to \$33.75). Our most recent issue is Issue 013.

**NOTE:** Electronic copies of your E-letter will be sent to you via e-mail attachment.

## **PRODUCT & LIABILITY DISCLAIMER**

### **DO NOT TOUCH THE CONTENTS OF THIS KIT UNTIL YOU READ THE FOLLOWING:**

The expected testing lifetime of these vials is endless with prudent handling. They contain certain and distinct imprinted frequencies as any homeopathic preparations and, therefore, are not subject to any chemical or molecular analysis. These vials are for clinical research bio-resonance testing by qualified licensed professionals only, practicing any AK, EAV, BFD/VEGA methods which are not registered by the FDA as accepted medical diagnostic devices. As a rule, in the practice of rendering alternative medical services whenever appropriate in accordance with given state laws, an informed patient consent may be necessary. The manufacturer cannot in any way guarantee positive clinical results which are subject to a practitioner's level of knowledge, training, skill and motivation. Some of these testing vials may have different volume contents. For testing purposes a vial that contains even a drop of testing liquid in it is as effective as the vial that is filled to the rim. However, lest possible evaporation or leakage occur check and tighten carefully the screw cap of each vial to its maximum without breaking it. In order to protect our clients in view of a possible energetic or chemical contamination of the vials or platform in which case distorted testing results may occur, in no event will there be any refunds or exchanges. **This sale transaction is final.**

### **Recommendations & Handling Instructions**

1. In case you wish to increase the content volume of a given vial you may open it and add good quality spring water under pressure using a syringe, for example, without allowing it to touch the rims of the vial. Deliver afterwards 10 successive hard impacts at the bottom of the vial against a book with a hard cover.
2. Remove each vial tray only by holding against a carton or flat foam pad underneath to prevent the falling out of the vials.
3. Examine all the vials at the time of purchase. Should any of the vials be completely empty, return it promptly and it will be replaced for no cost with our apology.
4. In case of spillage of any substance on the testing platform, clean it with rubbing alcohol. Keep platform's surface & "honeycombs" clean.
5. Wipe off handle bar with either alcohol or hydrogen peroxide after each patient use.

### **WARNING – The following factors may affect adversely the energetic integrity of the vials:**

1. **Keep the vials and testing platform at a distance of at least 2-3 feet from these devices.**
2. **Direct exposure to fluorescent light when the set is open.**
3. **Patients holding vials during testing may lead to their energy imprints into the vials. Conduct the testing only via a testing platform. Handle the vials yourself whenever possible only through touching the plastic cap.**
4. **Any electromagnetic or magnetic duplication of the vials will ruin instantly their information content and render them ineffective for testing.**
